3M™ Hot Melt Adhesives

Fast setting adhesives. Applied for speed and durability.

PRODUCTS SHEET

3M™ Hot Melt Adhesives offer many benefits for success with a variety of assembly and/or closure applications.

Flexibility: Open time or bonding range is the maximum time between applying adhesive and joining the surfaces.

Speed and Ease: Each adhesive is engineered for efficient application with an easy-to-use 3M portable applicator.

Improves Appearance: Unlike mechanical fasteners and sealing tapes, hot melt adhesive is virtually invisible between the mating surfaces.

Bonds Variety of Surfaces: Combine a wide variety of materials ranging from wood to corrugated cardboard, heat-sensitive foam and even plastics and metals.

Each adhesive is designed and precisely manufactured for efficient use in one of the portable 3M™ Scotch-Weld™ Hot Melt Applicators.

Bond wood, plastic, foam, fabric, cardboard, and much more.

3M™ Hot Melt Adhesives also enable:

- Improved productivity.
- Minimum waste.
- Lower cost.

On the overleaf there is just a small selection of our 3M™ Hot Melt Adhesives. We offer many more products within this range. If you have a requirement you would like to discuss please contact your Area Sales Manager or nearest branch.

Faster than wood glue.

Providing an invisible bond.

Precise and even flow.

3M™ Hot-Melt Adhesive Quadrack Sticks (5Kg)

3762Q

Multi-Purpose Hot Melt Adhesive

- Fast setting adhesive obtaining strength in seconds . Good “hot tack”
- Ideal for packaging and woodworking applications
- Open time approx. 50 seconds

3M™ Low-Melt Adhesive Quadrack Sticks (5Kg)

3762 LMQ

Multi-Purpose Low Melt Adhesive

- Fast setting obtaining strength in seconds, bonds heat sensitive material
- Bonds foam, card, packaging, expanded polystyrene
- Excellent “hot tack”
- Open time approx. 25 seconds

3M™ Hot-Melt Adhesive Quadrack Sticks (5Kg)

3748Q

Tough, Flexible Hot Melt Adhesive

- Good high temperature stability and thermal shock resistance
- Designed for plastics and polyolefin bonding, including ABS, PVC, polycarbonate, polypropylene and polyethylene
- Open time approx. 50 seconds

3M™ Hot-Melt Adhesive Quadrack Sticks (5Kg)

3764Q

Flexible Hot Melt Adhesive

- Flexible at low temperatures for easy application of adhesive
- Impact-resistant for long-term durability
- Good shear and peel strength
- Good at bonding plastics
- Open time approx. 50 seconds

3M™ Hot-Melt Adhesive Quadrack Sticks (5Kg)

3792Q

General Purpose Hot Melt Adhesive

- Sets clear for clean appearance
- Bonds wood, fabric, upholstery & other lightweight material bonding
- Medium viscosity
- Open time approx. 50 seconds

3M™ Low-Melt Adhesive Quadrack Sticks (5Kg)

3792 LMQ

General purpose low-melt adhesive

- Sets clear for clean appearance
- Bonds wood, fabric, expanded polystyrene, foams and other lightweight materials
- Use for bonding heat sensitive materials
- Open time approx. 50 seconds
