3M™ Spray Adhesives

Streamline your assembly operation with convenient, efficient 3M™ Spray Adhesives.

PRODUCTS SHEET

With any 3M™ spray adhesive comes ease and convenience. There are no glue brushes to maintain and no half-empty, sticky cans to collect dirt. Only a finger's touch puts a job-matched formulation to work on a wide variety of materials.

Convenience: For smaller jobs or multiple stations.

Speed and Ease: No equipment, no mess, no setup. As handy self-contained applicators, 3M aerosols also save the expense of complex systems.

Coverage: Quickly cover a large surface area with the adhesive without compromising bond strength.

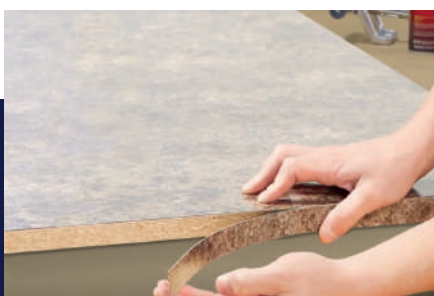

Controlled spray patterns: Minimize overspray, clean-up, and unused adhesive.

3M™ offer spray adhesives for bonding to metal, high-pressure laminate (HPL), plastic, insulation, foam, fabric, wood, MDF and a wide range of other substrates.

3M™ Spray Adhesives also enable:

- Higher solids content than a comparable volume of canned solvent-based adhesive. The bottom line – you get more usable adhesive for your money.
- Quick adhesion without losing any of its bonding strength.

On the overleaf there is just a small selection of our 3M™ Spray Adhesives. We offer many more products within this range. If you have a requirement you would like to discuss please contact your Area Sales Manager or nearest branch.

Bonds a range of substrates.

Foam fast spray adhesive.

Multi-purpose spray adhesive.

3M™ Foam Fast Spray 74 Spray Adhesive 500ml Can

74

Foam fast aerosol adhesive

- High strength bond
- Formulated for bonding flexible urethane or latex foam to itself & most other materials
- The adhesive develops tack very quickly allowing faster assembly of parts
- 5 second to 10 minutes bonding range
- Approx. coverage per tin is 4 square metres

3M™ Super 77 Multi-purpose Spray Adhesive 500ml Can

77

Multi-purpose aerosol adhesive

- Fast drying, high strength bond
- Permanently bonds many lightweight substrates to painted/unpainted metals, wood, hardboard etc. Bonds Styrofoam (Polystyrene)
- High solids content - gives high coverage
- For general decorating, mounting & framing
- 30 seconds and above bond range
- Approx. coverage per tin is 12 square metres

3M™ Spray 90 Hi-Strength Adhesive 500ml Can

90

Hi-strength aerosol adhesive

- High initial strength bond, often comparable to that of a brush applied contact adhesive, strong resistance to water & long-term aging
- Easy to dispense industrial grade formula
- Bonds most materials
- 30 seconds to 15 minute bonding range
- Approx. coverage per tin is 3.7 square metres

3M™ Scotch-Weld™ 75 Re-positional Adhesive 500ml Can

75

Versatile, re-positionable aerosol adhesive

- Suitable for temporary holding/positioning of lightweight materials
- Bonding range from 5 seconds - several hours
- Its low peel strength allows for even lightweight materials to be lifted/repeatedly repositioned
- Resists wrinkling on most materials to produce a clean and smooth appearance
- Approx. coverage per tin is 13 square metres

3M™ Rubber And Vinyl 80 Spray Adhesive 500ml Can

80

High strength neoprene-based contact adhesive

- Good plasticiser resistance
- Bonds to most substrates
- Quick drying - bond time 3 - 15 minutes
- Approx. coverage per tin is 7 square metres

3M™ Industrial Cleaner 500ml Can

- Heavy duty cleaner/ degreaser that works effectively on difficult to remove substances such as many dried, non-curing adhesives, tape residues, grease, oils and dirt
- The cleaner emulsifies when flushed with water
- The cleaner is based on a citrus oil and does not contain chlorinated compounds or petroleum distillate solvents
